## **True Heading receives order from Swedish Defence Material department FMV.**

**True Heading (Publ), listed at Aktietorget, has received an order to provide AIS services to FMV.**

FMV has from True Heading ordered services for a total period of two years at a value over 3 MSEK. Further the order also includes an option to provide AIS equipment from the True Headings AIS product range.

True Heading is since several years been involved in supporting FMV and the Navy with AIS related issues. The AIS system plays an important role in the ongoing maritime operations outside Somalia and in the Indian Ocean that currently is led from the Swedish ship HMS Carlskrona.

– With the quick development going on within the AIS field it is important for the navy and the armed forces to be correctly updated with there systems in the international environment that exists today. We have a world leading experience within the AIS field and support FMV with this at the same time as we can provide a unique understanding of maritime operations, says Anders Bergström, Manager för True Heading (ex Navy officer).

## True Heading AB

True Heading AB (publ), listed at the equity marketplace Aktietorget, is a world leading company providing AIS solutions. AIS are a new technology and a safety equipment for navigation. It forms a natural part of the onboard system for navigation; in navigation, detection of other ships and during Search and Rescue (SAR) if the an accident has oddured. In the near furture it will be possible to rescue a man over board with AIS. True Heading are also a proud distributor for COMNAV, FLIR, HEMISPHERE and VESPER MARINE products in Sweden. More information at [www.trueheading.se](http://www.trueheading.se)

*True heading is an essential term when navigating a ship. Accomplishing the goals of a journey requires a sense for the true heading. True heading points out the correct direction when navigating. Selecting True Heading for your journey is a guarantee that the destination will be reached in a safe, timely and cost efficient way.*

AIS RX PRO delivered to several navies and authorities around the world.
